

Get Your “Hands On” the Industry’s Leading Industrial Hygiene Web Application

Join us in the Chicago Hyatt Regency McCormick Place at the 7th Annual IH Forum on 16 May 2006 from 0900-1300 to try out the system that allows you to—

- Define your Industrial Hygiene Program’s scope and support of resources.
- Perform basic characterizations of the workplaces at your installation.
- Form similar exposure groups of the workers at the workplaces.
- Develop workplace monitoring plans for control of hazards or to identify negative exposures.
- Characterize exposures through sampling.
- Perform exposure assessment through qualitative or quantitative statistical means.
- Report results to customers (Commanders, supervisors, workers, occupational health professionals).
- Reevaluate.

The best way to anticipate, recognize, evaluate and control workplace hazards

Defense Occupational & Environmental Health Readiness System
INDUSTRIAL HYGIENE

Rickenbacker Air National Guard Base

DOEHRS-IH user interface is very intuitive to use, making navigation and data entry easy with an acceptable response speed. The layout of the DOEHRS screens is very straightforward. The data entry screens were well structured and with the use of the expansion feature the screen space was manageable. Instructors were excellent in every aspect. They did a top notch job.

Naval Hospital, Pensacola

The Master Schedule and Workbasket features have been well received by our staff and will enhance our scheduling and traceability efforts. The Program Office Equipment module has also been well received by our staff and shows great promise for helping us better manage our large inventory of IH equipment.

Fort Lewis Industrial Hygiene Office

We have been anticipating DOEHRS-IH for a long time but the wait has been worth it. One of the many advantages we see is the ability to take electronic worksite documentation out into the field via tablet PCs. Once at the site we can update information while there and then simply “upload” it when we get back to the office. This will be a significant timesaver. Great job to all involved.
