NEWS RELEASE

1982 KIRTLAND'S WARBLER TOURS, MICHIGAN

Kirtland's Warbler nesting areas in Northern Michigan will be closed and posted against public entry during the 1982 nesting season. Warbler watchers may see the bird and view nesting areas only by participating in guided tours.

Free guided tours to Warbler nesting areas will depart from the Michigan Department of Natural Resources Grayling Field Office in Grayling, and from the U.S. Forest Service District Ranger Office in Mio. The tours will begin on May 15 and will end July 4. The Grayling tour will be offered everyday at 7 a.m. and 11 a.m., The Mio tour will be offered at 7:30 a.m. Wednesday through Sunday with an 11 a.m. tour on Saturday and Sunday only. No tours will be offered on Monday or Tuesday at Mio.

Actual sighting of the Kirtland's Warbler is not guaranteed. The average date of arrival at the nesting area of the first Kirtland's Warbler is May 12; the latest recorded date of the first arrival is May 20. Thus, the chance of seeing the bird during the early guided tours is less than optimum. The best period for seeing the Warbler is during late May and the month of June. The chance of viewing diminishes after July 1. Participants are encouraged to bring binoculars or spotting scopes. Tape recorders will not be allowed, and special efforts will not be made for photographers.

Tour guides prefer small groups because they create less disturbance and are more likely to see the bird. No reservations are necessary for individuals or small groups, but large groups are urged to contact the following offices after April 25, 1982 for reservations so that time schedules can be established.
